

Air lines frozen?

TRI-FLUID INJECTOR

A leader in the elimination of
costly downtime!

We Have The Answer

to the Aggravation & Cost
of Compressed Air Line Freeze-Ups.

The TRI-FLUID INJECTOR is designed for the increasing number of applications asking for NO-TOX2[®], our NON hazardous formula:

- **Model TFI 3.4 – Treats 4,000 to 26,000 cfm**
- **Model TFI .86 - Treats 1,000 to 8,000 cfm**
- The most cost effective way to prevent compressed air freezing
- Use any of Tanner's three de-icant formulas, **TANNERGAS[®], NO-TOX2[®] & FROSTO[®]**
- Easy to install
- Low maintenance
- Capable of de-icing up to 100,000 cfm by special order
- Large 30 gallon reservoir
- 150 psi maximum working pressure (with simple modifications up to 500 psi)
- The TFI prevents the freezing of all moisture even after air dryers have been used

For more information about the TRI-FLUID INJECTORS visit our website www.tannersystems.com.

Note: Tri-Fluid Injector replaces Frosto Electric Vaporizer

TANNER[®] DE-ICANTS

TANNER DE-ICANTS are available in three advanced liquid Formulas: TANNERGAS[®], NO-TOX2[®] and FROSTO[®]. When Tanner De-icants are injected directly into your compressed-air equipment they bond with the moisture and prevent it from freezing. Tanner De-icants also have special additives that prevent corrosion and inhibit rust, plus a special lubricant that helps prevent O-rings and other rubber or synthetic parts from drying.

TANNERGAS[®]

FOR USE IN TANNER COMPACT DE-ICERS, TANNER TANKS AND THE TRI-FLUID INJECTORS.

TANNERGAS[®] is introduced into the air lines by atomization. TANNERGAS[®] is available in **5, 30** and **54 gallon** containers and in convenient **1 quart** containers, 12 per case. TANNERGAS[®] is effective in open-air, above ground applications.

NO-TOX2[®]

USE WITH TANNER COMPACT DE-ICERS, AND THE TRI-FLUID INJECTORS.

NO-TOX2[®] is recommended for use in confined atmospheres such as mines and tunnels to **-40°F**. It meets advanced safety standards required for an increasing number of applications. Available in **1, 5** and **54 gallon** containers. NO-TOX2[®] cannot be used in TANNER TANKS or FROSTO[®] ELECTRIC VAPORIZERS.

FROSTO[®]

FOR USE IN THE FROSTO[®] VAPORIZER AND THE TRI-FLUID INJECTORS.

When introduced into air lines by our FROSTO[®] Electric Vaporizer, or our TRI-FLUID INJECTORS, 100% atomization is achieved. FROSTO[®] is available in **30** and **54 gallon** containers.
